

INDUSTRIAL PRODUCTS & SPARES DIVISION

LASER CONSUMABLES • CHILLER SPARES • PRESS-BRAKE TOOLING • PLC / I/O / IIoT • CNC / VMC SPARES • CUSTOM REPLACEMENTS

Source. Verify. Supply. Support.

1. ABOUT CRECER GRANDE

Creceer Grande is an engineering and industrial services venture focused on helping manufacturing and engineering businesses improve machine uptime, source industrial components, manage engineering work and strengthen business documentation. We combine engineering capability, an on-demand technical network and practical manufacturing support to provide flexible solutions without the overhead of a large permanent organisation.

2. ABOUT THE DIVISION

Creceer Grande - Industrial Products & Spares Division supports manufacturers and machine owners with model-dependent industrial consumables, maintenance spares, control-system components and hard-to-source replacement parts. The customer shares machine, chiller, controller or cutting-head details, part number or available dimensions; Creceer Grande then identifies an OEM, compatible aftermarket or engineered replacement route and states the basis of supply clearly.

3. OUR CAPABILITIES

Laser Cutting, Welding & Marking Components

Application-matched consumables and replacement parts

- Cutting nozzles and nozzle holders
- Protective windows / cover glasses
- Ceramic rings and selected optical accessories
- Focusing / collimating lenses where correctly identified
- Laser welding nozzles, copper tips and protective optics
- F-theta / field lenses subject to wavelength and work-field compatibility
- Marking fixtures and identification-project support

Laser Chiller & Cooling Spares

Model-specific cooling components

- Coolant / circulation pumps
- Filters and filter elements
- Flow switches / sensors
- Temperature sensors
- Solenoid valves and fittings
- Hoses, connectors and sealing parts
- Cooling fans and selected electrical components

Automation, Control & Electrical Products

Control hardware and industrial connectivity

- PLC / PAC controllers
- Digital / analog I/O modules
- HMI panels
- Communication modules
- Power supplies, relays and contactors
- Industrial IoT / edge gateways
- Sensors, switches and panel housings

Machine, Sheet-Metal & Custom Spares

Fabricated, machined and reverse-engineered replacements

- Press-brake punches and dies
- Brackets, guards, covers and mounting plates
- Bushes, spacers, collars, shafts and rollers
- Coupling / conveyor components
- Selected CNC / VMC spares
- Reverse-engineered obsolete parts

Compatibility & Supply Control

What we verify before supply

- Make / model / part number
- Machine or chiller nameplate
- Dimensions and mounting
- Voltage / frequency / power
- Pump flow / head / ports
- Optical wavelength / diameter / coating
- PLC / I/O family and protocol

Supply Basis

Clear commercial positioning

- OEM / genuine - only when explicitly sourced and stated
- Compatible aftermarket - clearly identified as compatible
- Engineered replacement - based on available data / sample
- No unverified cross-reference presented as exact equivalence
- Acceptance criteria confirmed in quotation or PO

Application-Sensitive Parts

Fitment details matter

- Laser power alone does not determine chiller-pump compatibility
- Optical components depend on wavelength, diameter and coating
- Electrical and automation parts depend on protocol / family
- Installation should follow machine / component documentation

4. REQUIREMENT-LED IDENTIFICATION

- Start from make/model/part number or approved sample
- Compare dimensions, ratings, interfaces and duty
- Clarify whether the supply is OEM, compatible or engineered
- Document assumptions and acceptance criteria

5. CUSTOM REPLACEMENT ROUTE

- Photograph / sample / dimensions
- Engineering study or reverse engineering where required
- Manufacture / source through suitable route
- Inspection and supply against agreed criteria

6. REPEAT SUPPLY CONTROL

- Approved sample or drawing
- Previously accepted make/model
- Inspection and certificate requirements
- Packing / marking requirement
- Delivery location and target date

7. INDEPENDENT SUPPLY POSITIONING

- Brand names are used to identify the installed equipment or compatibility requirement
- No claim of OEM endorsement unless expressly stated
- Application-sensitive components require verified technical data

9. WHAT YOU CAN SEND US

Clear Photographs

Show the existing component and installation context.
Machine / Chiller / Controller

Share make, model and nameplate.
Part Number

Provide the existing part number where available.
Dimensions / Ports

Include thread, port, mounting and interface details.
Electrical Rating

Voltage, frequency, power and other relevant ratings.
Quantity & Failure Symptom

State quantity and the issue when replacement follows a breakdown.

10. WHY CRECER GRANDE

- Engineering-led compatibility checks rather than blind cross-reference
 - Access to OEM, aftermarket and engineered replacement routes
 - Ability to connect supply with design, manufacturing and inspection support
 - Clear basis of supply and requirement-led identification
-

11. OUR VALUE PROPOSITION

SOURCE. VERIFY. SUPPLY. SUPPORT.

Creceer Grande helps identify, verify and supply industrial products and hard-to-source spares using the available machine, application and component information.
